

CanM8 FAQ's

How do I install a CanM8 interface?

It is an easy 4-wire connection, Live, earth, CanHI and CanLOW. If you scan the QR code on the interface you can browse technical specs for the vehicle you are working on and where to connect to.

What kind of data can I extract from a CanM8?

The type of data extracted depends on the model of the interface purchased, common data points.

Do I need special software to use it?

No, but you can download the app. If you scan the QR code on the product you can type in the specific vehicle you are working on and it will give you technical data and CAN connections for said vehicle. Please bear in mind the QR code is one time use only.

Can I transfer the CanM8 device to another vehicle?

Yes, the interface has multiple vehicles pre uploaded to identify which vehicle it is connected to.
