

PARKING SENSOR SWITCH WITH “P” LOGO

D-SEN-01951

12v round rocker switch that can be used to isolate power to a set of rear parking sensors or to enable/disable a front set of parking sensors.

The switch is extremely rugged and durable (ball switch). The round rocker switch has a semi matt finish and green LED. Simple installation with notched retention mechanism. Secure hold in the hole due to tolerance equalization notches The LED lights up when the switch is in the on position.
