

DCON NON-SPLIT CONDUIT

High-Performance Polyethylene Conduit

Ensure superior cable protection with our high-flexibility polyethylene conduit, designed for demanding automotive and industrial applications. Engineered for durability and ease of use, this conduit offers exceptional chemical resistance, making it ideal for harsh environments.

- Material: Polyethylene – strong, lightweight, and resilient
- Temperature Range: -40°C to +150°C – reliable in extreme conditions
- Chemical Resistance: Withstands oils, fuels, and harsh chemicals
- Ease of Use: Designed for smooth, hassle-free wire insertion
- High Flexibility: Adapts effortlessly to tight spaces and complex routing

Perfect for auto electrical engineers and fleet operators, this conduit provides long-lasting cable protection while ensuring a simple and efficient installation process.

Upgrade your wiring setup with a conduit that delivers both performance and reliability.

Conduit Diameter (Internal-External)
6.9-10mm
9-14mm
11.4-15mm
13-18mm

Length
