12v Heavy duty rear view camera available in 720p quality. Featuring a 120° 2.8mm wide angle lens, mirror image for the correct video orientation and automatically switches to night vision when in low light conditions.

IP68 certification for excellent protection against water and dust ingress, plus solid metal housing makes this a very popular and reliable choice for fleet vehicles of all industries.

The adjustable mount also enables this camera to be installed at virtually any point on the rear of a vehicle, helping drivers identify hazards to avoid costly incidents and reduce vehicle downtime.
