

32 GB INTEGRAL HIGH ENDURANCE MICRO SD CARD – DESIGNED FOR DASH CAMERAS

These Premium High Speed Micro SD cards from Integral offer superior, super-fast read and write speeds – ensuring that you can record high-definition video and take burst mode photos with confidence.

D-ACC-27827

Compared to regular microSD cards, high endurance cards typically have better wear leveling algorithms, more advanced error correction mechanisms, and improved firmware to handle the demands of continuous read and write operations. This enables them to handle a higher volume of data writes over a longer period without experiencing data corruption or card failure.

Additionally, high endurance microSD cards often come with features such as temperature resistance, shock resistance, and waterproofing, which further enhance their durability and suitability for harsh environments and their robustness and longevity make them ideal for applications where data integrity and reliability are critical.

- 100MB/s transfer speeds allow fast data transfer
- Provides smooth Full HD and 4K video recording
- Video Speed Class 10 (V30)
- A1 App Performance Specification – high IOPS ensures best performance.
- UHS-I, Class 1 specification
- SD adapter included
- Memory class 1UHS-1
- Memory class 2 U3
- EAN 5055288444843
- Product width – 15mm depth – 1mm height – 11mm weight – 0.5g
- Capacity 32gb
- Interface 8 pin
- Certification UKC
