

LEXAR PROFESSIONAL MICRO SD CARD – DESIGNED FOR DASH CAMERAS

These Premium High Speed Micro SD cards from Lexar offer superior, super-fast read and write speeds – ensuring that you can record high-definition video and take burst mode photos with confidence.

Available in:
64GB, 128GB, 256GB

Compared to regular microSD cards, high endurance cards typically have better wear leveling algorithms, more advanced error correction mechanisms, and improved firmware to handle the demands of continuous read and write operations. This enables them to handle a higher volume of data writes over a longer period without experiencing data corruption or card failure.

Additionally, high endurance microSD cards often come with features such as temperature resistance, shock resistance, and waterproofing, which further enhance their durability and suitability for harsh environments and their robustness and longevity make them ideal for applications where data integrity and reliability are critical.

- Professional-level performance for dash cameras
- Leverages UHS-I technology to deliver read speeds up to 160MB/s (1066x)
- Quickly capture high-quality images and extended lengths of Full-HD and 4K UHD
- Load apps quicker with blazing A2 speed
- Includes SD adapter
- 160MB/s Read
- 120MB/s Write
