

LEXAR NQ100 1TB SSD SOLID STATE DRIVE

Lexar NQ100 1TB Solid State Drive is a dependable digital storage medium for use with our MDVRs. Capable of high speed data transfer, well suited for multi-channel recording at 1080p.

D-ACC-28155

Solid state drives offer massively improved performance and reliability over traditional mechanical Hard drives. Having no moving parts, solid state drives are much more reliable when used with MDVRs within fleet vehicles, especially those which venture off-road.

SSD's also feature far higher read & write speeds when it comes to saving data when compared to mechanical hard drives. Featuring SATA III 6.0 Gbit/s technology which is backwards compatible with last generation hardware (3.0 Gbit/s and 1.5 Gbit/s).

Specifications:

- Digital storage capacity – 1000GB (1TB)
- Sequential read rate – 550MB/s max
- Sequential write rate – 400MB/s max
- Hard disk interface – Serial-ATA
- Connectivity technology – SATA
- Brand – Lexar
- Model NQ100
- Form Factor – 2.5 inches
