

## TOSHIBA L200 1TB HDD

Toshiba L200 1TB HDD is a dependable digital storage medium for use with our MDVRs.

Capable of high speed data transfer, well suited for multi-channel recording at 1080p.

D-ACC-01523

In a DVR (Digital Video Recorder), the HDD (Hard Disk Drive) plays a crucial role as the primary storage medium for recording video from cameras or television sources. Its main function is to store the captured footage, allowing for later viewing, analysis, and management.

This makes the HDD an essential component for various applications, including security monitoring, where recorded video can be reviewed to investigate incidents.

### Specifications:

- Digital storage capacity – 1000GB (1TB)
- Sequential read rate – 500MB/s max
- Sequential write rate – 400MB/s max
- Hard disk interface – Serial-ATA
- Connectivity technology – SATA
- Brand – Toshiba
- Model L200
- Form Factor – 2.5 inches
